

4. Using Different Logical Connectors (and patterns of subordination & co-ordination)

Source:

Many management theories have been put forward to help us understand the concepts of motivation and leadership. While they are interesting, some seem incomplete or flawed.

Paraphrase:

Although the many motivation and leadership theories which were put forward were very interesting, some seemed incomplete or flawed.

5. Changing the Order of the Information

Source:

The secret of success in financial management is to try and increase value.

Paraphrase:

To try and increase value is the secret of success in financial management

6. 'Packing' (or expanding) Noun Groups

Packing the noun group with more information usually involves changing some of the structures in the original source (such as verbs and adjectives) into nouns. It is more often associated with writing a summary.

Source:

We have seen that corporations raise money by selling financial assets such as stocks. This increases both the amount of cash held by the company and the amount of cash held by the public.

Summary:
