Course objectives:

The semester project gives students an opportunity to use the theoretical knowledge, gained through their studies, in the solution of specific problems. It consists of the following parts:
analysis of the state of the art in the given area, presentation of possible solutions and detailed description of the chosen one.

Requirements on student

The course is focused on working out a particular basic part of the diploma work under the leadership of the work supervisor. This is usually done through individual tuition offered to a student by his work supervisor.

assessment methods

Knowledge - knowledge achieved by taking this course are verified by the following means:

Individual presentation at a seminar

Skills - skills achieved by taking this course are verified by the following means:

Project

Competences - competence achieved by taking this course are verified by the following means:

Project

prerequisite

Knowledge - students are expected to possess the following knowledge before the course commences to finish it successfully:

- prokázat další odborné znalosti samostatným studiem teoretických poznatků strojírenského základu
- vysvětlit získané teoretické znalosti ze studovaného základu a ze svého odborného zaměření potřebné pro řešení zadaného technického problému

Skills - students are expected to possess the following skills before the course commences to finish it successfully:

- Apply the acquired knowledge
- suggest possible solutions to the problem being investigated

Competences - students are expected to possess the following competences before the course commences to finish it successfully:

N/A

N/A

teaching methods

Knowledge - the following training methods are used to achieve the required knowledge:

Individual study

Skills - the following training methods are used to achieve the required skills:

- Self-study of literature
- One-to-One tutorial

Competences - the following training methods are used to achieve the required competences:

Self-study of literature

learning outcomes

Knowledge - knowledge resulting from the course:

- describe the relevant technical problem
- Analyze the relevant technical problem

Skills - skills resulting from the course:

- design a new variant solution to the problem

formulate a comprehensible technical idea

zpracovat technickou zprávu dle předepsaných kritérií

Competences - competences resulting from the course:

N/A

N/A
